

€52 billions

for private companies... and less and less
for our wages and public services !

SPOT THE MISTAKE !

Every year, €52 billion in subsidies and tax breaks are granted to private companies in Belgium.

And the Arizona government (MR-Engagés-N-VA) wants to dig the hole even deeper.

Two new policies have been added:

- A cap on employer contributions for very high salaries - an additional €75 million in gifts to the wealthiest.
- Increased reductions in contributions for low and middle salaries - €1 billion less in revenue for social security.
- These tax breaks for employers, granted without any conditions on employment, do not create sustainable jobs.
- They weaken social security, freeze wages and jeopardise our public services.
- While companies reap the profits, workers foot the bill.

Enough ! Join the November appeal!

ON NOVEMBER 26TH WE'LL BE ON STRIKE

**For enhanced Social security, quality education,
and decent working conditions for all.**

Let's not allow another gift to employers.

Together, let us take back control of our future.
